1 Introduction

This document sets out the additional detailed methodology specifications for BMR Benchmarks. (“BMR” refers collectively to the EU benchmark regulation and the UK benchmark regulation post Brexit.)

A “BMR Benchmark” is an MSCI Private Real Estate Index for which MSCI Limited has provided written permission in each instance to its client to be used for a BMR regulated use.

The process to request BMR regulated use for these BMR Benchmarks or other indexes can be found on the index regulation page of MSCI’s website at www.msci.com/index-regulation.

With respect to the BMR, for BMR Benchmarks in the MSCI property benchmark family, MSCI has chosen not to apply certain articles of the BMR as allowed under the BMR. MSCI has published a [MSCI Real Estate – BMR property benchmark family - Compliance Statement](#) which explains the exemptions taken by MSCI.

BMR Benchmarks fall into two families based on the their ‘input data’ as defined by the BMR:

- MSCI property benchmark family.** The input data for this family is property valuations, and in periods when a transaction occurs, the property transacted prices. The data for each of the properties in the relevant BMR Benchmarks is supplied by MSCI’s data providers. Based on MSCI’s current understanding and assumptions, property valuations are “contributions of input data” under the BMR.
No other substitutes are made and no other order of priority of use of input data applies to this family.
- MSCI property fund (with published NAV) benchmark family.** The input data for this family is the Net Asset Value (“NAV”) of each of the funds included in the relevant BMR Benchmark as supplied by its data providers. This input data is published on the MSCI website at each index release. Because the data is publicly available, the data is considered “readily available” and is not “contribution of input data” under the BMR.
There are no substitutes for fund NAVs and therefore no priority of use of input data for this family.

4 MSCI Real Estate - BMR Benchmarks Methodology Specifications

The methodology specifications for construction of benchmarks are provided in the next two sections. All BMR Benchmarks are or are constructed from the MSCI UK Annual Property Index, the MSCI UK Quarterly Property Index or the MSCI/AREF UK Quarterly Property Fund Index. The specifications are described as follows:

| | Description |
|-----------------------------|---|
| BMR Benchmark Name | This is the official name of the BMR Benchmark |
| Peer Group Filter | The Standard Index or sub-index, with any exclusions, from which the BMR Benchmark is constructed |
| Geographic Filter | Geographic Filter which could indicate a country or region within a country |
| Property Attribute Filter | Property attribute filters encompass a wide variety of asset characteristics that can be used to define index subsets. The most frequently referenced attributes are property sectors and more detailed property types. |
| Primary Methodologies | The primary methodologies to which these specifications are applied. |
| History | Frozen or unfrozen. Note, all BMR Benchmarks are required to have frozen history. |
| Refresh Cycle | Annual or Quarterly |
| Minimum Valuation Frequency | Annual or Quarterly |
| Publication Frequency | Annual or Quarterly |
| Rebalancing Frequency | Annual or Quarterly |
| Currency | GBP |
| Measure | Total Return or Net Total Return - unitized adjusted for crossholdings |
| Sample Filter | All Assets or Standing Investments |
| Measure Function | Weighted average or Percentile ranking |

5 ESG Disclosures

As part of the European Union's Sustainable Finance package, the Benchmark Regulation has been amended to require benchmark administrators to publish specified ESG metrics for all EU regulated ESG indexes and to make certain ESG related disclosures in the methodologies for all EU regulated indexes.

Refer to Appendix I and II for the details on ESG disclosures. This information is provided as per the European Commission's Delegated Regulation (EU) 2020/1817, supplementing Regulation (EU) 2016/2011 of the European Parliament and of the Council (the "EU Benchmark Regulation") as regards the minimum content of the explanation on how ESG factors are reflected in the benchmark methodology.

For example (but without limitation), the Information may not be used to create indexes, databases, risk models, analytics, software, or in connection with the issuing, offering, sponsoring, managing or marketing of any securities, portfolios, financial products or other investment vehicles utilizing or based on, linked to, tracking or otherwise derived from the Information or any other MSCI data, information, products or services.

The user of the Information assumes the entire risk of any use it may make or permit to be made of the Information. NONE OF THE INFORMATION PROVIDERS MAKES ANY EXPRESS OR IMPLIED WARRANTIES OR REPRESENTATIONS WITH RESPECT TO THE INFORMATION (OR THE RESULTS TO BE OBTAINED BY THE USE THEREOF), AND TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, EACH INFORMATION PROVIDER EXPRESSLY DISCLAIMS ALL IMPLIED WARRANTIES (INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTIES OF ORIGINALITY, ACCURACY, TIMELINESS, NON-INFRINGEMENT, COMPLETENESS, MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE) WITH RESPECT TO ANY OF THE INFORMATION.

Without limiting any of the foregoing and to the maximum extent permitted by applicable law, in no event shall any Information Provider have any liability regarding any of the Information for any direct, indirect, special, punitive, consequential (including lost profits) or any other damages even if notified of the possibility of such damages. The foregoing shall not exclude or limit any liability that may not by applicable law be excluded or limited, including without limitation (as applicable), any liability for death or personal injury to the extent that such injury results from the negligence or willful default of itself, its servants, agents or sub-contractors.

Information containing any historical information, data or analysis should not be taken as an indication or guarantee of any future performance, analysis, forecast or prediction. Past performance does not guarantee future results.

The Information should not be relied on and is not a substitute for the skill, judgment and experience of the user, its management, employees, advisors and/or clients when making investment and other business decisions. All Information is impersonal and not tailored to the needs of any person, entity or group of persons.

None of the Information constitutes an offer to sell (or a solicitation of an offer to buy), any security, financial product or other investment vehicle or any trading strategy.

It is not possible to invest directly in an index. Exposure to an asset class or trading strategy or other category represented by an index is only available through third party investable instruments (if any) based on that index. MSCI does not issue, sponsor, endorse, market, offer, review or otherwise express any opinion regarding any fund, ETF, derivative or other security, investment, financial product or trading strategy that is based on, linked to or seeks to provide an investment return related to the performance of any MSCI index (collectively, "Index Linked Investments"). MSCI makes no assurance that any Index Linked Investments will accurately track index performance or provide positive investment returns. MSCI Inc. is not an investment adviser or fiduciary and MSCI makes no representation regarding the advisability of investing in any Index Linked Investments.

Index returns do not represent the results of actual trading of investable assets/securities. MSCI maintains and calculates indexes, but does not manage actual assets. Index returns do not reflect payment of any sales charges or fees an investor may pay to purchase the securities underlying the index or Index Linked Investments. The imposition of these fees and charges would cause the performance of an Index Linked Investment to be different than the MSCI index performance.

The Information may contain back tested data. Back-tested performance is not actual performance, but is hypothetical. There are frequently material differences between back tested performance results and actual results subsequently achieved by any investment strategy.

Constituents of MSCI equity indexes are listed companies, which are included in or excluded from the indexes according to the application of the relevant index methodologies. Accordingly, constituents in MSCI equity indexes may include MSCI Inc., clients of MSCI or suppliers to MSCI. Inclusion of a security within an MSCI index is not a recommendation by MSCI to buy, sell, or hold such security, nor is it considered to be investment advice.

Data and information produced by various affiliates of MSCI Inc., including MSCI ESG Research LLC and Barra LLC, may be used in calculating certain MSCI indexes. More information can be found in the relevant index methodologies on www.msci.com.

MSCI receives compensation in connection with licensing its indexes to third parties. MSCI Inc.'s revenue includes fees based on assets in Index Linked Investments. Information can be found in MSCI Inc.'s company filings on the Investor Relations section of www.msci.com.

MSCI ESG Research LLC is a Registered Investment Adviser under the Investment Advisers Act of 1940 and a subsidiary of MSCI Inc. Except with respect to any applicable products or services from MSCI ESG Research, neither MSCI nor any of its products or services recommends, endorses, approves or otherwise expresses any opinion regarding any issuer, securities, financial products or instruments or trading strategies and MSCI's products or services are not intended to constitute investment advice or a recommendation to make (or refrain from making) any kind of investment decision and may not be relied on as such. Issuers mentioned or included in any MSCI ESG Research materials may include MSCI Inc., clients of MSCI or suppliers to MSCI, and may also purchase research or other products or services from MSCI ESG Research.
